# The Mobile App Masterplan: Learn How To Make Excellent Money Selling Apps And Quit Your Job (no Coding Required) (Online Business Collection Book 1)

Synopsis

The mobile app revolution is here, so why not join in and download your copy of The Mobile App Masterplan right now! Have you ever thought about making money by publishing an app? Did you know that anyone can easily and inexpensively do it now? Since the iPhone came onto the market in 2007 mobile apps have quickly become the next gold rush of the technology world. With the amounts of money being spent on cell phones and mobile apps itâ ™s no surprise that millionaires are being made every single day in this industry. Iâ ™m not here to tell you that by uploading an app you will strike it rich like that but to offer you a way to gradually build up a passive income source. In my book, The Mobile App Masterplan, I show you exactly what you need to do to start building up a portfolio of mobile apps to earn you a passive income that earns day after day. You probably have heard of Angry Birds or Plants vs. Zombies? Those are blockbusting mobile games apps that have made it big. You donâ ™t however need to create a superstar game to make money with apps. Even the most basic apps have the opportunity to make money due to the sheer volume of people owning a mobile phone and downloading apps. In my book I will show you how you can start your mobile app empire, taking advantage of the leverage the internet brings to start a business both cheaply and quickly. You donâ ™t even need to have any coding knowledge. In fact I advise against doing any sort of coding at all unless you have a fantastic idea you are passionate about. If you want a money making business then take my advice, it will get you further a lot quicker. In a nutshell,I'll give you a rundown about everything you need to know to launch your brand new app. I will show you why you should outsource your app to be made and NOT spend a fortune! Explain how to make money with your app. Give you exclusive contacts to get started.Also FREE Bonus material including downloads, free software and more if you want to easily build your own app at home!For the price of a coffee you will get a lot of valuable information to get you started making money with apps.Thank you and good luck!Mark

Customer Reviews

I have been interested in making money online, bought some course, but most of them didn't work for me. I was thinking about letting go the idea of passive income and internet marketing.But his book was like a life savior for me, because it showed me how I can make money selling apps. I liked that this book is very detailed, walks you through everything step-by-step. It shows you how to get ideas, where to find an app developer, how to build a brand and much more. Right now, I already launched 3 apps, and they are doing great, I think that after a couple months I will be able quit my job nad live from passive income!If you really want to make money online and get passive income, then this book will definitely help you to do that

This new book by Mark Weston delivers exactly what promises in the title. For someone aiming to start a mobile app business, this book has all the tools - and is particularly useful on how (more broadly) the reader can gain additional knowledge, I can definitely recommend getting this book. Jake

When looking for an app and coming up empty handed, I always think â œman, I should make this app and make a killing off of it because I know I'm not the only person needing something like this.â • but I never knew where to start. But this book has given me a starting place in creating an app. This is a great book for beginners with the step by step process. I really enjoyed this book and can't wait to get to work.

This book has it all. I love the way there is a masterplan included in the back so you can follow step

by step instructions that the author uses to create their own apps. I feel like I have struck gold.. Now just to get my thinking cap on and start brainstorming.

This is the first book of its kind that I've read. I'm ready to get into the field of app creation and passive income. I took tons of notes and I finally know where to begin. This book is straight forward, easy to understand (not too technical), and thorough in what it covers. I'm feeling inspired!

If you have plans to launch a mobile app, this book is just the one for you! From the birth of the app idea to its final launch and attractions, this book is a step-by-step guide to your mobile app and also earning a lot from the same. We might be confused on marketing the app, further app development, and the ongoing trends in the cyber world. But this book gets rid of all your queries and provides you with the right information on all these aspects. The best part of this book is it sticks to reality and on a read of this the next step is to simply put what weâ ™ve read into action. Iâ ™d recommend this book to those who are looking for an innovative way to earn a living.
